

APD Ltd | Amber Programmable Design | Control With Power

We design, manufacture, integrate and install industrial automation and process control systems for use in industries such as nuclear, oil and gas, food and beverage, automotive, pharmaceutical and renewables.

Our talented and multi-skilled workforce has earned APD an enviable reputation for reliability, experience and innovation; providing our clients with a complete control solution from initial concept right through to final commissioning and maintenance.

Based in southern Scotland in the small town of Annan, with a satellite office in Aberdeen, we have over 30 years of experience providing solutions such as control panel design and manufacture, network architecture, installation and commissioning, maintenance and more.

Our clients are located around the globe and we have completed projects in the UK, France, Germany, Sweden, Norway, Finland, South America, Malaysia and Australia, generating a huge library of reference designs.

Amber Programmable Design is a member of SELECT, is an accredited Safecontractor, is fully NICEIC approved and is accredited with ISO9001 and ISO14001.
